JUBILEE CELEBRATION OF M. E. CHURCH BEGINS TOMORROW

Program Will be Given Morning, Afternoon and Evening. With Bishop More One of the Leading Participants—Several Events Have Been Arranged for the Coming Week.

The fiftieth anniversary and golden jubilee of Grace M. E. church will be celebrated during the coming week. Commencing with tomorrow a program will be given in the morning, afternoon and evening. Nothing has been arranged for Monday, but Tuesday day evening there will be a grand musical service commencing at 8 o'clock; the golden jubilee banquet will be given Wednesday evening; the jubilee lecture Thursday evening; and Friday evening there will be a jubilee platform meeting.

Fellow programs for the anniversary celebration have been issued. The second page is occupied by half tone pictures of Rev. A. B. Sutcliffe, the present pastor of the church; James Pryor, a leading pioneer in the work; and Rev. C. M. Thompson, a leader in the building of the present edifice. Some of the most noted divines in the country have been secured to take part in the services of the week. Probably the most noted is Bishop David H. Moore, D. D., L. L. D., of Cincinnati. The program for tomorrow follows:

10:30 a. m.—Organ Voluntary.
Hymn No. 2.
Apostles Creed.
Prayer by Rev. James Pascoe.
Antiphon, "Te Deum" by choir (Went).

Scripture Lessons and Gloria.
Notice and Golden Offering.
Baptismal song, "Song of Thanksgiving" (Frances Allerton), Dr. W. R. Hodges.

Hymn No. 208.
Sermon by Bishop David H. Moore, D. D., L. L. D.
Hymn 415.
Announcement of offering.
Doxology.
Benediction.

12:15 p. m.—Special Sunday school and bible session in charge of Superintendent S. G. Pierce.
Address by Rev. Ames A. Maywood.

2:30 p. m.—Union Temperance mass meeting at the Korodge theater. Addresses by Bishop Moore and Dr. Samuel Dickie.

6:00 p. m.—Epworth League devotional meeting.
Special speakers.
7:00 p. m.—Organ Voluntary.
Doxology.
Psalm 23.
Hymn 219.
Prayer.

Solo, "The Prodigal Son," (Parker), Miss Cox.
Announcement and special offering.
Duet, "Hope Beyond," Messrs. Hodges and Everts.

Sermon by Dr. Plantz of Lawrence University.
"Hallelujah Chorus" by choir.
The following anniversary committees have been named:

Arrangement committee—James Pascoe, I. A. Dowle, A. B. Sutcliffe, S. G. Pierce, James Pryor, N. G. McMillan.

Musical committee—Mr. Whitford, Mr. Cox, Mrs. Mills, Miss McKernan.
Material and advertising—A. B. Sutcliffe, R. T. Bennet, J. S. Penrose, Mrs. Pierce, Mrs. Shields.

Banquet menu—Mrs. Dowle, Mrs. McNair, Mrs. Cox, Mrs. Bond.
Finance committee—Prof. Grant, Mr. Odgers, Mr. Brown, Mr. Deschamps.
Entertainment and comfort—A. K. Cox, C. E. Road, E. E. Tracy, W. A. Durkee.

ARTICLES FOR THE POOR.

The usual custom of distributing food and clothing to the poor by the public schools of Houghton will probably commence Monday morning. As usual the collection by the schools has been going on for the past several days but not until the first of next week will it be given out. The Central school is headquarters for all contributions of either food or clothing, and those who are able and inclined to be charitable may send their contributions to that place.

The Houghton high school football team returned last evening from Marinette where they played football Thanksgiving day.

OUT-OF-KIDNEYS WILL ACT FINE AND ANY BACKACHE SIMPLY VANISHES

Just a Few Doses Regulate the Kidneys and Bladder and Make Lame Back Feel Fine—Every Man and Woman Here in Calumet Knows the Results of Neglected Kidney Disorders.

The most effective and harmless way to cure backache and regulate out-of-order kidneys, or end bladder trouble, is to take several doses of Pape's Diuretic.

You will distinctly feel that your kidneys and urinary organs are being cleaned, healed and vitalized, and all the miserable symptoms, such as backache, headache, nervousness, rheumatism and darting pains, inflamed or swollen eyelids, irritability, sleeplessness, or suppressed, painful or frequent urination (especially at night) and other distress, leaving after taking the first few doses.

The moment you suspect any kidney or urinary disorder, or rheumatism begin taking this harmless prepara-

LAST JURY CASE OF PRESENT TERM OF COURT ON MONDAY

The last jury trial of the present term of circuit court will come up Monday morning when the Gertrude Phillips case will be taken up.

The case is an appeal taken from the probate court and one which has been before the public for some time. The husband of Mrs. Phillips filed a petition some time ago asking that a guardian of an administrator be appointed to take charge of the Phillips property, the husband alleging that his wife is mentally affected and incapable of looking after the interests. Mrs. Phillips claims she is entirely sane and able to conduct her own affairs. The case will probably last two or three days. This will clear the civil calendar and the jury will probably be discharged Tuesday or Wednesday.

Following the civil calendar comes the chancery cases and indications point to this work occupying the attention of the court for several days. The chancery calendar is very heavy. Clerk Richardson said yesterday afternoon that court would probably not adjourn until close to the holidays, if indeed it would finish then.

The sudden ending of the Sophia Koskila vs. John Steinback case in the court yesterday afternoon was entirely unexpected. The plaintiff was represented by Burritt & Burritt of Hancock, and Ball & Stone of Houghton appeared for the defense.

Judge Streeter stated this morning that the Hamilton matter would in all probability come up Monday, and that an order would be issued giving the Grand Rapids attorneys a copy of the testimony. If an appeal in this case is taken, and such seems very evident, it will be watched with deep interest by copper country people. The consternation which the incident brought about in this county was such that the matter is still fresh in the minds of the public. It was one year ago yesterday that Hamilton was taken to Marquette to serve his life sentence.

HURONTOWN DANCE TONIGHT.

Two Silver Cups Will be Awarded to the Best Dancers.

Two silver cups will be awarded this evening at a dancing party to be given in the Hurontown fire hall by the Isle Royale band. The cups will be awarded to the best two-step and waltzing couples. Following is the program:

Two-step, "The Volunteers."
Waltz, "Memory's Dream."
Two-step, "New Administration."
Waltz, "Fairy Dream."
Two-step, "Boy's Brigade."
Waltz, "The Merry Widow."
Two-step, "Excellent."
Waltz, "The Poet's Dream."
Two-step, "The Undercurrent."
Waltz, "Diana."
Two-step, "National Pride."
Two-step, "The Craftsman."
Waltz, "Lucia."
Two-step, "The Crusader."
Waltz, "Something Sweet."
Two-step, "Greater Warning."
Waltz, "The Fairies' Ball."
Two-step, "Our Glorious Flag."
Waltz, "Artie's Dream."
Waltz, "Good Night."
Two-step, "Black Flag."
Waltz, "Again to Kiss Good Bye."

HUNTER LOST IN WOODS.

Robert Beilby of Dowagiac Believed to Have Lost His Life.

Robert Beilby of Dowagiac, Mich., aged 49, while hunting deer near Tunis, on the C. M. & St. P. Ry., eight miles southeast of Sidnaw, strayed from the rest of the party, Tuesday forenoon, November 16, during a severe snow storm, and has not been located since, and it is probable that he perished in some unknown manner, in the woods.

The members of the party searched the vicinity Wednesday without success, and Thursday dispatched a messenger to Sidnaw for help.

Another messenger was sent immediately to the woods to secure the services of P. A. Pequet and J. M. Sullivan, two of the foremost cruisers and woodsmen of upper Michigan, and on Saturday Messrs. Pequet and Sullivan, with a thoroughly organized party of twelve men left for the vicinity and are now conducting a thorough search for the missing man. So far no trace of him has been found.

A marriage license was issued this morning to Lars Wuopa and Hilma Elindholm, both of Calumet.

TENDER MARIGOLD REMOVING WARNING MARINE BUOYS NOW

The lighthouse tender Marigold is now engaged in removing the gas buoys and other lights and markings of the shoals and dangerous channels in Lake Superior, preparatory to the closing of navigation, having begun that work a couple of weeks ago.

Some of the vessel masters have expressed the opinion that the present method of removing the buoys is wrong from the fact that so many of them are removed before the season is closed, and just when they are needed most during the entire season. The same complaint also applies to placing them in the spring. Said a master yesterday:

"Under the present method of placing and taking in the gas buoys, opening the lighthouses, etc., the tenders barely get them placed in the summer before they start in taking them up for winter. It seems to me that some other method ought to be adopted in doing this work."

One marine man said he thought a good plan would be to adopt that followed by the Canadian government, where private tugs are employed to do this work, a contract being given for a small territory, which can be accomplished in a short time. In that way the buoys, spars and light keepers could all be placed within a short time in the spring and removed at the very close of navigation. The cost, in that way, he says, would be but little more to the government and would serve the vessel interests to much larger extent.

MEMORINEE TEAM LOSES.

The Memominee-Ann Arbor game at Ann Arbor on Thanksgiving day resulted in a victory for Ann Arbor by the score of 42 to 0.

WHEELS REPLACE RUNNERS.

Signs of April were in evidence on all sides today. November, with its usually chilly winds, was no where in sight and instead of four-buckle articles to keep the cold damp snow out, storm rubbers were used to keep the water from soaking through the soles of one's shoes. The village street cleaners were out today in their summer barb and very few sleighs were to be seen. Outside the village limits sleighing is much better although none too good to speak of.

WEDDED AT HURONTOWN.

A pretty wedding took place Wednesday evening at Hurontown at the home of Mr. and Mrs. Ernest Liebetrau when their daughter, Miss Alma Liebetrau, became the bride of John Rinn. Miss Katherine Richards was bridesmaid and the bride's brother, William Liebetrau, was best man. The ceremony was performed in the presence of a number of invited guests by Rev. O. Traub, pastor of the German Lutheran church of Hancock. The bride wore white satin messaline, pearl, trimmed, and carried bride's roses and lilies of the valley. The bridesmaid wore pink silk and carried pink roses.

MOTON BREVITIC.

Mrs. David Levitan and daughter, Miss Anna, of L'Anse, are guests of Houghton friends.

Tim Harrington and Oscar Granlund will wrestle mixed style this evening in the South Range roller rink. Much interest is centered in the match. Two good preliminaries have been arranged.

Captain Ripley of the Soo returned to his home yesterday morning. He came here several days ago, bringing the international which will run to the White City next summer. Jared R. Cook, engineer on the boat, also from the Soo, left last evening for Minneapolis where he will visit his son for a short time. The excursion boat has been put into winter quarters for the season.

C. M. Greenwald, with the Remington Typewriter Co., is in the copper country on business.

The steamer John R. Stanton cleared from the Copper Range dock this morning at 10 o'clock. The Stanton arrived the latter part of the week with 10,000 tons of coal. This was the last coal boat to arrive here.

Fred Francis, a sailor of the John R. Stanton was up before Justice brand this morning charged with being drunk. He paid \$5 and costs.

LIVE IN POLAR CAVES.

Island Eskimos Who Have Been Cliff Dwellers From Remote Times.

Five hundred feet above the troubled surface of Bering Sea, which dashes itself to spray on the bare rock wall far below them, lives a race of real cliff dwellers, writes the Nome correspondent of the Seattle Post-Intelligencer. How long these strange people have been nestled in the caverns of Kings Island no one pretends to know. But they are there today, living in much the same way as anthropologists say our ancestors lived some time in the long ago after they had given up roosting in trees.

Kings Island, like the Diomedes and other islands in Bering sea and Bering Strait, is of limestone formation with what the geologist calls karst intrusions. This peculiar formation is favorable to the formation of caves, and Kings Island is honey-combed with caves and grottoes. One great cave is over 200 feet in height.

The Eskimos who inhabited these caves and whose descendants still clamber up and down the precipitous ledges have added to the ancient cliff dwellings of a more remote period a newer type of dwelling. In winter they creep back into the rock chambers that are greasy with the memory of

Sold Everywhere. In boxes 10c. and 25c.

much blubber and many big feasts in the days that were. But in summer the Kings Island abandons his ancestral home and fixes up a home that is a thousand times more puzzling to the traveler than is the simple abode of a real cave man. Great poles are fixed in the rocks, and on these is built a boxlike affair, which is then covered with walrus skin. These walrus skin cabins look for all the world like coffins suspended on poles, but when the summer tourist approaches them he finds that every one is full of very lively Eskimos with sundry pups and venerable dogs scrambling out to give voice to a strange greeting.

King's Island is the flat top of some sunken mountain. Its sides rise quite perpendicularly from the water to a height of over a thousand feet. All round its four miles of shore line there is not a square yard of beach, and only a few feet away the water is fifty fathoms deep. Owing to the fact that the region about Bering Strait is almost always stormy, it is nearly always quite impossible for white men to land on this island. The native by long practice has learned how to land his big skin "oomiak" and to launch it even when the bravest white man would fear to approach the rocky shore. In launching their big canoes several men get in and their canoe and all are thrown upon the surf as a wave is churning.

Although Kings Island is a barren rock with practically no vegetation, the hundred or so natives who live there do not starve. In fact, it is just possible that the average white family is not much better off in the way of eating when taste is left out of the equation, than are these belated cliff dwellers on Kings Island. The sea around them abounds in walrus, and when the ice pack begins moving through Bering Strait great herds of walrus may be heard through the long snuff night bellowing like wild cattle. To an Eskimo a walrus is just plain meat, and from the time that the first snows of winter come over the ice until the last ton of blubber is stored in the great cave no one sleeps on Kings Island. Sometimes sixty walrus have been killed out of one herd by these daring sea hunters. The ivory from these creatures rolls into many hundreds of barrels.

These "live" people who live just below the Arctic circle are also great walrus hunters, and there is seldom a year goes by that some of these levitations of the deep do not feel the savage thrust of the cliff dwellers' harpoons. With walrus and white meat galore and hundreds of seals and thousands of Bering Sea herring, the Kings Island natives live fairly well.

Probably the finest ivory carvings in the world come from Kings Island. Not only is the carving of these caribou heads remarkably well done, but the drawings of nearly all the animals of the sea which adorn the surfaces are exquisitely done and make the boards very attractive to white purchasers.

REV. ANNA HOWARD SHAW.
New York, Nov. —Rev. Anna

Syrup of Figs and Elixir of Senna

Cleanses the System Effectually.

Dispels colds and Headaches due to Constipation.

Acts naturally, acts truly as a Laxative.

Best for Men, Women and Children—Young and Old.

To get its beneficial effects, always buy the Genuine.

Manufactured by the CALIFORNIA FIG SYRUP CO.

SOLD BY ALL LEADING DRUGGISTS
one size only, regular price 50¢ per bottle.

Dispels the Cold

On the north side of the house where wintry blasts vent their fury—in the most exposed room—the transition from shivery cold to welcome warmth is quickly made by the use of the

PERFECTION Oil Heater

(Equipped with Smokeless Device)

Blizzards may rage, snows fly and tempests howl, but warmth and glow are within with the Perfection Oil Heater.

No smoke—no smell—no bother—just real convenience, cheery comfort and coziness. Cleaned in a minute.

Brass font (never rusts) holds 4 quarts—burns 9 hours.

Cool handle—easily carried about from room to room, anywhere. Because of the

Automatic Smokeless Device

you can't turn the wick too high—can't make it smoke—no odor while burning at full heat. It is the most durable, efficient and simplest oil heater on the market. Various styles and finishes.

STANDARD OIL COMPANY

(Incorporated)

CURRENT GOSSIP OF THE COPPERS

J. A. Minnear & Co.

THE STOCK MARKET.

Naturally the developments following the Standard Oil decision last week proved to be the important market factors for the week. The street, though, has been inclined during the past few days to forget all about the matter. It will provide no further news now until taken before the United States Supreme court, which will pass finally on the question of further life for the Standard Oil company.

Before this decision is reached undoubtedly we will be able in a measure to forecast it, for quite naturally it will follow along the lines of the case against the tobacco trust. The case against the latter company was a blow to trusts and was appealed some months ago to the Supreme court. As the decision in the Standard Oil case was in a measure similar to that against the tobacco trust, the final result will probably be the same.

Talk of the copper combination will not down. This big deal has given the copper share market an impetus which promises to given even greater activity until the final details are made known. The market will then shape itself accordingly. There is some political talk being heard, but this is yet too early to prove of any material consequence, marketwise.

THE METAL MARKET.

With the assurance that the proposed copper merger will not be put off by reason of the adverse Standard Oil decision the copper metal market has shown greater firmness. While business has not been extremely brisk some fairly good sized blocks of copper have been taken. The metal is trading around 13½ cents per pound for electrolytic. Lake copper is an eighth of a cent higher. The month's business has been good, particularly during the first ten days. Foreign demand is hardly as heavy as it was three weeks ago, but the prospects are that November shipments will exceed those of October. Fourteen cents for copper before the close of the present year looks like a certainty.

CALUMET AND ARIZONA.

At the dividend meeting of the company which was held at the home office Wednesday of this week, all the Directors were present with the exception of Messrs. Tener and Cole. A quarterly dividend of \$1.00 was declared payable Dec. 20th, to stock on record Dec. 3rd. This was a little disappointing to a few, as \$1.50 was expected in some quarters. According to information received from reliable sources, Calumet and Arizona cost is about 8½ cents per pound. Figuring a production of approximately 28,000,000 pounds per year they are earning on a 13 cent market \$1,360,000.00, or nearly \$7.00 per share on the stock outstanding. The conservative policy of the directors is quite noticeable in only paying \$4.00 per year. The company has not met with the success in endeavoring to develop other properties held under option, this has helped to considerably reduce the earnings.

On the 1,100 and 1,200 level of the Oliver an excellent body of sulphides have been uncovered. The developments on the 1,350 level of the Senator and Sunnyside claims are also showing up some very fine bodies of ore.

SUPERIOR AND PITTSBURG.

In our last week's letter we mentioned that the cost of producing was about 12 cents. This was an error. The costs are a little under 10 cents per pound. With the present production of 2,000,000 pounds, they are earning at the present time about \$80,000.00 per month.

ELDERADO.

The party of local people who have just returned from the property are highly satisfied with the showing. They have put up the required capital individually for the placing of the property on a dividend earning basis, hence there will be no more treasury stock offered for sale. It is the intentions of the management to sink the shaft 200 feet further immediately. In the meantime they will get the ore on the 400 level arranged so that it can be drawn without timbering. Inside of six months the property will be sufficiently developed to keep the 20 heads running steadily and conservative estimates place the earnings, with the 20 stamps running regular, at not less than \$10,000.00 per year, which is 20 per cent. on the outstanding capitalization.

The vein on the 400 level shows three very rich shutes varying in length from 50 to 80 feet and from

one to three feet wide. These shutes from the history of the country are expected with greater frequency and richness with depth. Since the visit of the local people to the property, more gratifying results have been had in developing, according to telegraphic advice received. At present they are operating only 5 heads regularly, taking only such ore as is necessary in drifting and upraising. We look for Eldorado to be an active trader on the curb very soon and believe it has an exceptional bright future.

NEW ARCADIAN.

This property lies between Quincy, formerly the Old Franklin, and the Franklin, Jr., and extends from Portage Lake North over 2 miles, comprising 2,000 acres, lying right in the path of the mineral belt. Nearly all of the stock held by the 1,500 stockholders of the old company has been transferred and steps have formerly been taken to wind up the affairs of the Old New Jersey corporation. The assessment called some time ago was promptly paid and sufficient funds are in the treasury to carry on the development work planned for the next six months without anticipating the assessment of 50 cents which is due March 1st.

Longyear and Hodge have been given the contract for extensive diamond drilling work. This work is to be carried on this winter. As they intend to make a complete cross section of the property about 5 holes will be necessary. The drill is 1½ inches in diameter and each hole is expected to be put down at least 2,000 feet. The first hole will be put down very close to the Ripley Falls and will be started Monday next. Some 40 years ago this section was worked and some mass copper was found. Some of the old shafts were down 200 feet but are now filled with water. Diamond drilling work will also be continued on the top of the hill.

CORDOVA.

There has been but little doing in this issue of late, while developments at the property are very encouraging and warrant higher prices. At the Eureka property they are working about 30 men. The crosscut which is being run from the 475 level of the Sullivan shaft has encountered some good ore in the past week, and every indication point to it being the Miami ore body. The crosscut is in over 1220 feet and is improving right along. They have shortly started sinking a shaft on the line between the Joomla and Osceola claims and only about 250 feet from one of the Inspiration drill holes, which has so far developed 200 feet of excellent concentrating sulphide ore and is still in the copper bearing body. There is little room for reasonable doubt that the Cordova will ultimately open bodies of ore that will assure its future as a profitable mine. Work is being continued at the Globe property with satisfactory results.

INSPIRATION.

The officials of this company have been visiting the property and private advice we have received from them state they are more than satisfied with the present showing. We also get it from good sources that there may be something doing in it marketwise very soon and as it has not reflected the better copper conditions and general advance in other copper securities, we believe it is a good purchase at the present time. It is estimated they have 45,000,000 tons of ore in sight. They have been developing the property mostly with drills but of late lateral exploration at depth is being conducted with very satisfactory results. The company owns 450 acres of some of the best ground in the Miami district and looks very attractive at the present time.

CORBIN COPPER.

Has been doing a few things on the curb of late selling up from 5 to 24. They have drifted on a fine body of concentrating ore, which shows an average width of 15 feet. They have had several test shipments from this ore body, to the Butte Reduction works, which when reduced 8 to 1, shows a value of 200 ounces of silver.

North Lake, Indiana and South Lake are all diamond drilling, with the expectations of striking the Lake lode. North Lake has had considerable trouble in drilling by encountering boulders, but the management has finally got this trouble remedied

(Continued on Page Three.)
